

DocWay™ eResults for SharePoint®

Overview

DocWay eResults for SharePoint is a SharePoint Search Connector solution for Documentum that indexes both the full text and the metadata of Documentum objects into SharePoint enabling a single result set across content from both repositories.

Features and Benefits

- Microsoft certified.
- Adheres to all Documentum security.
- Seamless and simultaneous access to multiple Documentum ECM systems and repositories.
- Searches attributes and document content.
- Works with all service packs of Documentum 5.25, 5.3, 6.0 and 6.5.
- Integrates tightly with Microsoft Office SharePoint Server 2007 and Microsoft Search Server 2008.
- Single result list with appropriate relevancy ranking.
- eResults connectors enable you to interface with other enterprise systems, including Microsoft Exchange, Lotus Notes, WorkSite, and third-party databases.
- Easy to customize and administer for mapping Documentum data into searchable SharePoint properties.
- Configurable docbase connections, search rules, and crawl schedules.
- 32-bit and 64-bit versions available.

About Wingspan Technology

Wingspan Technology provides integrated content management, indexing, search, and archiving software solutions to Documentum and SharePoint users in the life sciences, financial services, aerospace, and defense industries.
